kenexai

Job Title: Lead Data Engineer
Experience: 8+ Years
Location: Ahmedabad
Job Type: Full-Time
Department: Data & Analytics / Engineering

About Us:
Kenexai delivers smart, data-driven solutions that empower businesses across industries. Our mission is to combine deep, domain-specific expertise with cutting-edge technology to drive meaningful impact.
With a trusted team, consistent quality, and a growing global presence, we remain committed to delivering excellence while staying true to our core values: innovation, integrity, and client success.
Be part of a team that's not just building solutions but shaping the future with intelligence.

Role Overview:
We are looking for an experienced and strategic **Lead Data Engineer** to oversee the design, development, and implementation of our enterprise data platform. As a technical leader, you will work across engineering, analytics, and business teams to deliver scalable data solutions, while also guiding and mentoring a team of data engineers. This is a high-impact role ideal for someone who wants to combine deep technical expertise with leadership and vision.

Key Responsibilities:
- Design, implement, and manage scalable data pipelines and ETL/ELT workflows in AWS.
- Architect and implement scalable, secure, and high-performance data pipelines and systems.
- Guide the selection and implementation of modern data stack tools (e.g., Snowflake, Databricks, Redshift, dbt).
- Lead the design of data models, schemas, and data governance frameworks.
- Define and enforce coding standards, best practices, and quality assurance processes.
- Mentor and coach a team of data engineers; support their technical and professional growth.
- Manage task allocation, sprint planning, and delivery for the data engineering team.
- Collaborate with data scientists, analysts, and business stakeholders to ensure data accessibility and usability.
- Lead technical discussions, solution design, and architecture reviews.
- Ensure data systems are reliable, monitored, and fault-tolerant.
- Oversee performance tuning, cost optimization, and scaling of data infrastructure.
- Implement CI/CD, data testing, and deployment pipelines for data code.
- Champion data privacy, security, and compliance initiatives (e.g., GDPR, HIPAA, SOC2).

Required Skills & Qualifications:
- Bachelor's or Master's degree in Computer Science, Engineering, Information Systems, or related field.
- 8+ years of experience in data engineering.
- Expertise in **SQL**, **Python**, and distributed data frameworks (e.g., **Apache Spark**, **Flink**, **Kafka**).
- Strong experience with **cloud platforms** (**AWS, Azure, or GCP**) and cloud-native data tools.
- Proven ability to design and implement scalable ETL/ELT pipelines.
- Solid understanding of **data modeling, warehousing, lakehouse architecture**, and governance.
- Experience managing or mentoring a technical team.

kenexai

Good to Have:

- AWS Certified Data Analytics – Specialty or AWS Certified Solutions Architect - Associate/Professional.
- Experience with tools such as Airflow, dbt, Terraform, or Kubernetes.
- Knowledge of real-time data processing and streaming platforms.
- Familiarity with business intelligence and data visualization tools.

Why Kenexai?

- Be part of building something from the ground up in a high-growth, high-impact domain
- Work alongside passionate experts in AI, data, and industry consulting
- Competitive base + uncapped commission structure tied directly to performance
- Remote-first flexibility with real ownership and career growth potential

Perks and Benefits:

- Employees are entitled to flexible working hours to support work-life balance.
- The company operates on a 5-day work week.
- A healthy, inclusive, and collaborative work environment is maintained.
- The company organizes Fun Fridays and festive celebrations to foster team spirit.
- Employees have access to opportunities for continuous learning and career growth.
- An annual company trip is organized for team building and relaxation.
- Comprehensive medical insurance benefits are provided to employees.
- Performance-based bonuses and annual salary revisions are offered.
- A hybrid working model is available, allowing a mix of in-office and remote work as per company policy.
