Sai Muppalla

Data Engineer

Profile Summary

- IT professional with over **8 years** of experience, including approximately one year of onsite engagement with stakeholders in New Zealand, and experience working as a Technology Lead.
- Proven expertise in end-to-end Snowflake implementations, driving secure, high-performance, and cost-efficient analytics solutions on cloud.
- Experience in data preparation in Edit Query like add columns, changing data types, split columns, combining two columns, etc. for Data cleaning, shaping.
- Developed effective dashboards as per the business requirements implementing best practices on visualizations for a decision support system. These dashboards helped with how well they are performing in relation to their strategic goals for all the Business units.

Technical Skills

Databases	MS SQL Server, Oracle SQL, Snowflake
Development skills	Power Pivots, ADF, DBT
Languages	SQL, DAX, M-Language
Reporting Packages	Power BI, MS Excel, SSAS Tabular

Work Experience

Infosys Private limited
14 October 2021 – *19 February 2026*

- Schedule dbt jobs and configure job triggers (CI/CD runs, environment-specific workflows).

Cognizant Technology Solutions Pvt Ltd
21 November 2018 – 02 September 2021

- Delivered end-to-end Snowflake implementations, including architecture design, data ingestion, transformation, optimization, and consumption layers.

Tekskills India Pvt Ltd
04 August 2017 – 16 November 2018

- Established and implemented data governance, data quality, and security frameworks in Snowflake, enabling trusted and compliant data platforms.

Projects Handled

Project: Spark New Zealand *14* October 2021- 19 February 2026
Role: Data Engineer
Environments: Power BI, Snowflake, DBT

Roles &Resnonsihilities;

- Design and implement automated data tests (uniqueness, non-null, referential integrity, custom tests). Manage user access, permissions, and project settings in dbt Cloud
- Develop auditing, validation, and reconciliation frameworks using dbt snapshots and tests.
- Manage data lineage and documentation to ensure compliance and traceability.
- Monitor data quality SLAs using dbt test results in pipelines.
- Support regulatory reporting requirements by ensuring consistent, version-controlled models. Collaborated with cross-functional teams, including data engineers, analysts, and business stakeholders, to deliver high-impact data solutions.

Project: One NZ *21* November 2018 – 02 September 2021
Role: BI Developer
Environments: Power BI, Snowflake

Roles &Resnonsihilities;

- Applied Snowflake best practices for warehouse sizing, clustering, caching, and resource optimization to improve query performance and reduce costs.
- Performed advanced performance tuning and SQL query optimization, resulting in significant reductions in data processing time and compute usage.
- Worked extensively with cloud platforms (AWS / Azure), leveraging Snowflake integrations with cloud storage, networking, and security services.
- Demonstrated strong expertise in at least one cloud platform (AWS or Azure), including IAM, storage, computer, and monitoring services.
- Developed and automated data pipelines and analytical workflows using SQL, Python, and scripting, ensuring reliable and scalable data processing.
- Collaborated with cross-functional teams, including data engineers, analysts, and business stakeholders, to deliver high-impact data solutions.

Project: Microsoft Corporation *04* August 2017 – 16 November 2018
Role: Data Analyst
Environments: MS Excel, SQL Server, Power BI.

Roles & Besnonsihi1ities;

- Applied query folding techniques and aggregation strategies to improve refresh efficiency and reduce data movement.
- Monitored and troubleshot dataset refreshes and report performance, identifying bottlenecks across data sources, transformations, and DAX calculations.
- Optimized models using VertiPaq-aware design principles, including column encoding, cardinality reduction, and effective memory utilization .
- Defined and implemented KPI frameworks and standardized metric definitions, enabling consistent reporting across business domains.
- Built and governed reusable semantic layers to support self-service BI while maintaining centralized control and data quality.

Educational Qualifications

- B-Tech from JNTU, Kakinada and secured 78.2%
- Intermediate from Sri Sai Siddhartha Jr. College, Kanchikacherla and secured 92.3%
- SSC from Ushodaya E.M School, Kanchikacherla and secured 80.5%.

Achievements

- Awarded as "**ACE OF ROOKIES**" Certificate from Cognizant for best performer.
- Awarded as "**Outreach Voyager**" Certificate from Cognizant Outreach for participated in various social activities under NGO Organizations.

Strengths

- Good communication and Interpersonal skills.
- Able to communicate clearly and get along well with other co-workers.
- An eager learner with natural ability to cope under pressure.
- Adaptability at workplace.

Personal Details

Date of Birth	:	20th May 1994
Marital Status	:	Single
Nationality	:	Indian
Language Known	:	English, Hindi, & Telugu.

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge.

Date
